PROJECTS

- **Hostel Management System - Python Project**

Developed a comprehensive system to manage hostel operations, including student registration, room allocation, announcements, and complaints.
Utilized Python for backend logic and SQL for database management.
Demonstrated strong problem-solving skills and an understanding of database integration. Facilitated hands-on activities to enhance practical skills and application
GitHub-https://github.com/TharuprabhaThennakoon/Python-project

- **Event Management System-JAVA, HTML, CSS, SQL, PHP**

This project is a web-based Event Management System built using PHP, HTML, and a MySQL database created as part of a university second-year module.
The system allows users to view events while providing admin-level features for creating, updating, and managing event information.
